DON'T EXPERIMENT

Tatum Paper Punches are known and used throughout the world. To think of Punches is to think of Tatum and to think of Tatum is to think of Punches. The unusual strength of construction, combined with the accuracy of workmanship, makes possible the great variety of work, much of it involving new problems, which may be accomplished with TATUM MACHINES.

PAPER PUNCHES

No. 11-Adjustable Punch.

Here are a couple of low priced hand punches capable of punching a number of sheets with holes for 25-in. sectional posts at various distances.

These punches are recent productions and fill a long felt want.

No. 12-Punch.

Eclipse Punch.

The Eclipse is an all metal punch made in four sizes for $\frac{1}{4}$ -in. and $\frac{3}{8}$ -in. holes.

The Samson perforates two $\frac{1}{4}$ -in. holes $\frac{1}{4}$ -in. c. to c.

The Jumbo, same style as Samson, perforates two $\frac{1}{4}$ -in. holes $\frac{1}{4}$ -in. c. to c.

When you purchase a Tatum Paper Perforator, you are buying the best. Our perforators will last a life time.

Our authorized representative are ready to meet with you and prove the value of the Tatum Paper Perforator.

Several to choose from for any type of work.

SAMUEL C. TATUM

A New Office Punch.

The Mutat fills the growing and insistent demand for a single one-fourth inch round hole punch.

Mounted on an iron base $3\frac{1}{2} \times 5\frac{1}{2}$ inches handsomely finished in maroon.

The varied uses of loose leaf sheets has developed the call for an inexpensive punch capable of punching one or more holes in varied positions, and we predict a hearty appreciation and rapid sale of the Mutat punch.

Mutat punches are of the same high "Tatum" quality

as other goods made by the manufacturer, The Samuel C. Tatum Company, Cincinnati, Ohio.

R

Alphabetical Vertical Tab Folders.

Users of vertical filing systems will greatly appreciate the new alphabetical tab folders manufactured by the Yawman & Erbe Manufacturing Company, of Rochester, N. Y.

These tab folders are made in sets from 25 to 240—the alphabetical subdivisions being printed directly on the folder tab.

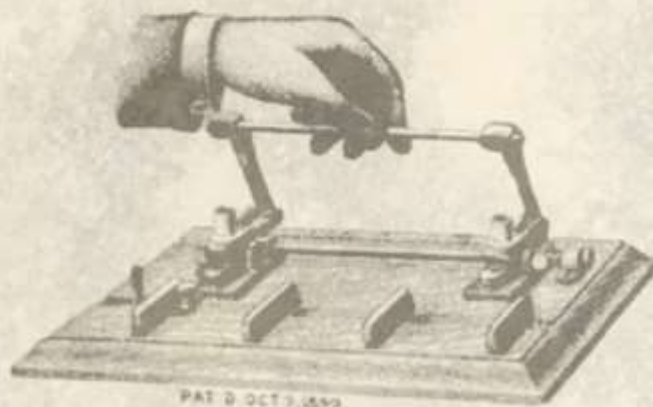

There are many uses for such folders, perhaps the greatest being for filing miscellaneous correspondence behind alphabetical index guides.

For instance, if there is a lot of correspondence behind the "S" guide, though not enough to warrant a separate folder

SAMUEL C. TATUM

New "Tatum" Punch.

There is shown herewith a cut of The Samuel C. Tatum Company's new adjustable punch for prong binders. The picture shown is the No. 30, which will perforate two sets of 13-64 inch diameter holes (13-16 inch center to center) from 2½ inches center to center to 8 inches center to center of outer holes. The

punch is attractive in appearance, mounted on golden oak board with the metal parts finished in black enamel, the trimmings being nickel plated. It will easily perforate twenty sheets of ordinary 16-pound folio paper. Accurate gauges and scales make the adjustment for any special job an easy matter. With additional heads three or even four holes can be made at once. Price list and complete information will be furnished upon request to the firm's office at Cincinnati.
